

## Downloading Kindle eBooks from Overdrive

### For Use with Kindle and Kindle iPad App

- Launch the Overdrive app on your iPad. If you have a Kindle either go to the library's website on your Kindle or on your computer and then click the e-books/e-audiobooks link. This will take you to the Overdrive catalog.
- Login in to your Overdrive account using your library card number.
- Search for Kindle eBooks and select a title to add to your cart.
- Checkout the book.
- Click the get Kindle book button. This opens a web browser window, which will take you to Amazon.com.
- Login to your Amazon account (if you are not automatically logged in).
- Make sure that the appropriate device is listed under "Deliver To" (it will say something like Sally's Kindle).
- Then click Get Library Book. **If you have a Kindle, this is your last step. You may now go to your Kindle where you will find the book on your home screen.** If you are using the Kindle app follow the remaining steps.
- Press the sync button in the bottom right corner of the screen.
- You should then see the number "1" appear on the "archived items" button in the bottom left corner of the screen. Press this button.
- Locate the book in the archives that you have just downloaded and click on it. The book will then be added to your Kindle app home page.

Happy Reading!!!
